# Retap Water Glasses 0.4

Retap's mission is to minimise the consumption of single-use plastic bottles. We believe that the most sustainable way to drink water is by refilling reusable drinkware with tap water. By avoiding single-use plastic, we protect the environment and people against chemicals and microplastic.

The beautiful and simple Retap Water Glasses match the Retap Carafe. The Scandinavian design assures that the water glasses fit into any setting. Together with the Retap Carafe, the water glasses are ideal to use at for example events, in hotels or restaurants, in meeting rooms or at home.

To give companies the opportunity to show their sustainable action and inspire others, we offer customised logo prints on the water glasses.

The Retap Water Glasses are made from borosilicate glass, which is heat-resistant, light-weight and meets the highest hygienic standards. Borosilicate glass is a pure material without lead or cadmium and it cannot contaminate water.

Our products are produced in a responsible way: Retap Drinkware is made from up to 30% recycled glass and to give a stronger durability, the drinkware is made of one piece of glass. All products are made in Europe.

- Designed in Denmark. Produced in Europe
- Water Glasses can contain 400 ml
- Made from borosilicate glass - up to 30% recycled glass
- Packaging: 24 pieces
- MOQ on water glasses:
